

## Synology - Jak propojit s 2N® Helios IP

Na následujících obrázcích bude vysvětleno, jak nastavit sekci "Onvif" na straně 2N<sup>®</sup> Helios IP a jak nastavit sekci "Device info" na straně Synology serveru, aby došlo k objevení patřičného 2N<sup>®</sup> Helios IP v síti.

1. Jako první krok musíte zkontrolovat nastavení v sekci Onvif, kde musíte povolit discovery mode na "Discoverable". V továrním nastavení bude vždy vytvořen uživatel admin/2n (Username/Password).

 Na straně Synology serveru budete moci objevit 2N® Helios IP jednotku. Poté musíte vyplnit detaily uživatele v sekci "Device Info", zadejte IP adresu manuálně, či využijte skenování LAN sítě a vyplňte Usern ame/Password - admin/2n.
